China's Belt and Road Initiative and Emerging Eurasian Relations

Focused on the "Belt and Road Initiative", this book discusses China's opportunities to translate economic leverage into political outcomes. The central question is how China's expanding economic influence will transform the Eurasian political landscape. Proposed in late 2013 by President Xi Jinping, the Belt and Road is the most ambitious foreign policy approach adopted thus far and represents the culmination of China's search for a grand strategic narrative. Comparative methods and diverse conceptual frameworks are applied to contextualize and explore the political, economic, and cultural ramifications of the Belt and Road in order to shed light on its transformative significance, risks and opportunities.
